Vivekananda School of Information Technology

ANDROID APPLICATION DEVELOPMENT WORKSHOP

ACE- The Technical Society of VSIT collaborated with Wingfotech and EDC IIT Delhi to organize Zonal Rounds of Utkraanti- A National Level Championship. Utkraanti aimed at developing student's interest towards new technologies. They brought students from all over the country together to participate in the celebration of knowledge and creative extravagance along with experts from the fields of robotics as well as automation industry.

Vivekananda School of Information Technology was the zonal centre of Utkraanti-2017. As a part of event two days Android Development workshop was organized on 3rd-4th November, 2016. Android Application Development is a course, which is designed for providing essential skills and experiences to the students in developing applications on mobile platform. The hands-on training is effective for beginners and experienced developers for practical Android Code Application. The purpose of the workshop was to introduce the students to Eclipse IDE and Android SDK.

On Day 1, the beginners were acquainted with the in-depth theoretical knowledge and the experienced developers devised ways to implement that practically. On Day 2, there was a live app development session, where students learnt to build music player application, SMS application, calculator and text-to-speech application. An App Development competition was also conducted and the winners would further take part in the National Level Championship that will be held at IIT Delhi. Certificates were distributed to each student for showing their enthusiasm.
